EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Rood on 5/3/2006.

The application has been amended as follows:

The specification of 9/22/2003 is entered and rewritten with correct line spacing as follows:

--Clip-on Brush Guard

BACKGROUND

The Brush guard is designed to fit any vehicle with a snow plow, whether it is prior to quick-mount systems, meaning the old style, wherein the plow frame stays on the truck or today's style where the plow frame comes off the truck with the plow and what you are left with on your truck is two push plates or brackets to receive the plow and frame. These brackets are very hard to remove and are made to stay on your truck even in warm weather. This makes for some unsightly pieces of metal protruding from your truck in a world where appearance is everything. I designed the brush guard to improve the appearance of the metal brackets and protect the grill and headlights of the vehicle.

Some notable features of the brush guard are steel tubing that make up cross

Art Unit: 3612

pieces with one quarter inch steel side plates. The total width of the brush guard will vary depending on what make and model of snowplow and the height will be determined by the vehicle. The receiver part of the brush guard (the bottom of the brush guard that clips onto the snow plow brackets) clips on the truck using two spring loaded connecting pins. When the brush guard is put into place you turn the pins and the brush guard is now mounted on your vehicle. There are two thumb screws, one on each side on the bottom of the brush guard receiver. These screws are to be tightened by hand to minimize movement of the brush guard once mounted on the vehicle. The clip-on brush guard will also come with pre-drilled holes for headlight guards and fog lights. Color selection will be determined by the vehicle.--

The specification of 4/18/2006 is entered following the specification above.

The claim of 10/18/2005 is not entered and the claims of 8/2/2004 and 9/13/2004 are canceled and replaced by the following, the only claim in the application:

--What is claimed is:

1. A Brush Guard designed to be used on trucks with snowplow push plates comprising:

L-shaped side plates connected by tubing cross pieces;

a C-channel welded to an inside surface of each of the side plates at its open end,

forming a closed cross section with the side plate;

a spring housing mounted on an inside surface of each C-channel forming a second closed cross section;

a spring loaded quarter turn fastener mounted to the spring housing with a rest surface within the spring housing;

wherein the push plates are received within the C-channel closed cross sections with the quarter turn fasteners in a retracted position abutting the rest surface and wherein the quarter turn fasteners are released to engage the side plates to retain the Brush Guard in position.--

The abstract of 9/13/2004 is written as one paragraph.

Drawings

2. The drawings were received on 4/18/2006. These drawings are approved as to substance. However, note the attached PTO-948 describing formal problems with margin size and descriptive matter, etc. under "comments". Figure numbers should remain on any amended figures.

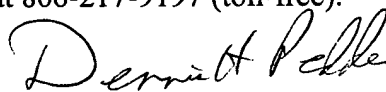

3. The following is an examiner's statement of reasons for allowance: The claim is allowed for the primary reason that the C-channel forming the closed cross section, unlike the C-channel of both Harris and Harrison, allows retention of the brush guard and side plates onto the snow plow push plates against the force of gravity, allowing disposition of the quarter turn fasteners with reduced effort while the brush guard is held in position.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dennis H. Pedder whose telephone number is (571) 272-6667. The examiner can normally be reached on 5:30-2:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn D. Dayoan can be reached on (571) 272-6659. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
